

## CEMBRIT METRO - CLADDING

# Cembrit Metro

Painted surface – in the color of your choice

Cembrit Metro lets you play with color to your heart's content. The sheets are covered with water-based acrylic paint that is 100% opaque, creating a smooth, even effect. The result is sheets that are resistant to green moss and algae, water stains, and dirt. They can take plenty of impact, too: the sheets will not buckle if struck, making them ideally suited to the hustle and bustle of the building site.

The URBANNATURE colors selected for the Cembrit Metro range are inspired by vibrant cities in Europe. Clear and bright, they exude sophisticated confidence. Cembrit Metro can also be supplied in any RAL colour.

Cembrit baseboard is available, with no colouration or surface treatment, for on-site finishing. Please contact Cembrit technical department for detailed advice on formats and installation.
