

NEW

Cembrit Zenit

Through-colored with paint coating

The new facade board, Cembrit Zenit, provides a unique combination of a through-colored baseboard and 100% opaque, water-based acrylic paint that matches the rich, natural colour of the baseboard. This combination gives a smooth, uniform surface and reduces the visibility of scratches. The result is boards that are powerfully resistant to green moss and algae, water stains, and dirt.

Cembrit Zenit comes in 10 colors named after planets in the universe. The range includes a choice of grays and clays corresponding with colors available in popular facade materials.

Colours

+ NCS-S *The representation of colours may deviate from the original product colours.*

The URBANNATURE range includes five facade products ranging from striking urban modernity to natural subtlety.

Cembrit Metro, fibre-cement board with opaque surface coating in vibrant colours, Cembrit Edge, a classic fibre-cement board with a tinted semi-transparent coating. Cembrit Fusion, the through-coloured board with a tinted semi-transparent coating and Cembrit True, the through-coloured board with a transparent coating.

The new Cembrit Zenit, the through-colored board with 100% opaque coating, completes the URBANNATURE range.

This insert should be read in conjunction with the latest version of the “URBANNATURE” cladding range brochure
